

bonshure[®]

mix & fill (Original)

Product Description

Bonshure color mix fill is a high-solids content waterborne binder based on acrylic for the production of wood putty. Is an economical product, quick and easy to use with most types of all wood. bonshure mix & fill is to mix with fine sawdust or wood dust from the timber. This will treated which give natural coloration.

Features

- Fast drying
- Easy to apply-simply mix with fine sawdust
- Low consumption
- Low odor
- Suitable for all types of wood
- Balance natural coloring timber for all types of wood
- Low solvent content
- Waterborne yet anti-corrosive

Preparation

Before applying the color mix fill, make sure the floor must be cleaned, dry with dust, dirt, wax and grease removed. Stir well with a stick before use.

Application

First mix the bonshure color mix fill with fine and clean sawdust / wood dust to a smooth consistency. The finer the dusting sand, the easier it will be to trowel-fill the mass and there will also be a better adhesion in the joints. Apply the mixture across the whole floor using a stainless steel trowel and repeat the procedure if necessary. If gaps wider than 2mm sanding will be next day to allow the mix fill drying time.

Technical data

Solid Content:	39.5%
Mixing Ratio:	40-50 % wood dust to 50 % color mix fill (gaps wider than 2 mm) 20-30 % wood dust to 80 % color mix fill (gaps wider less 2 mm)
Application Tool:	Stainless steel trowel
Application Rate:	18-22 m ² /Liter depending on size and quantity of gaps.
Drying time:	45-60 minutes depending on the width of the joint.
Shelf life:	Shelf life 12 months in unopened container
Packing Size:	4kg
